Corona Virus Statistics Platform (COVID-19) for the Cooperation Council for the Arab Countries of the Gulf (the GCC)

Covid19.gccstat.org
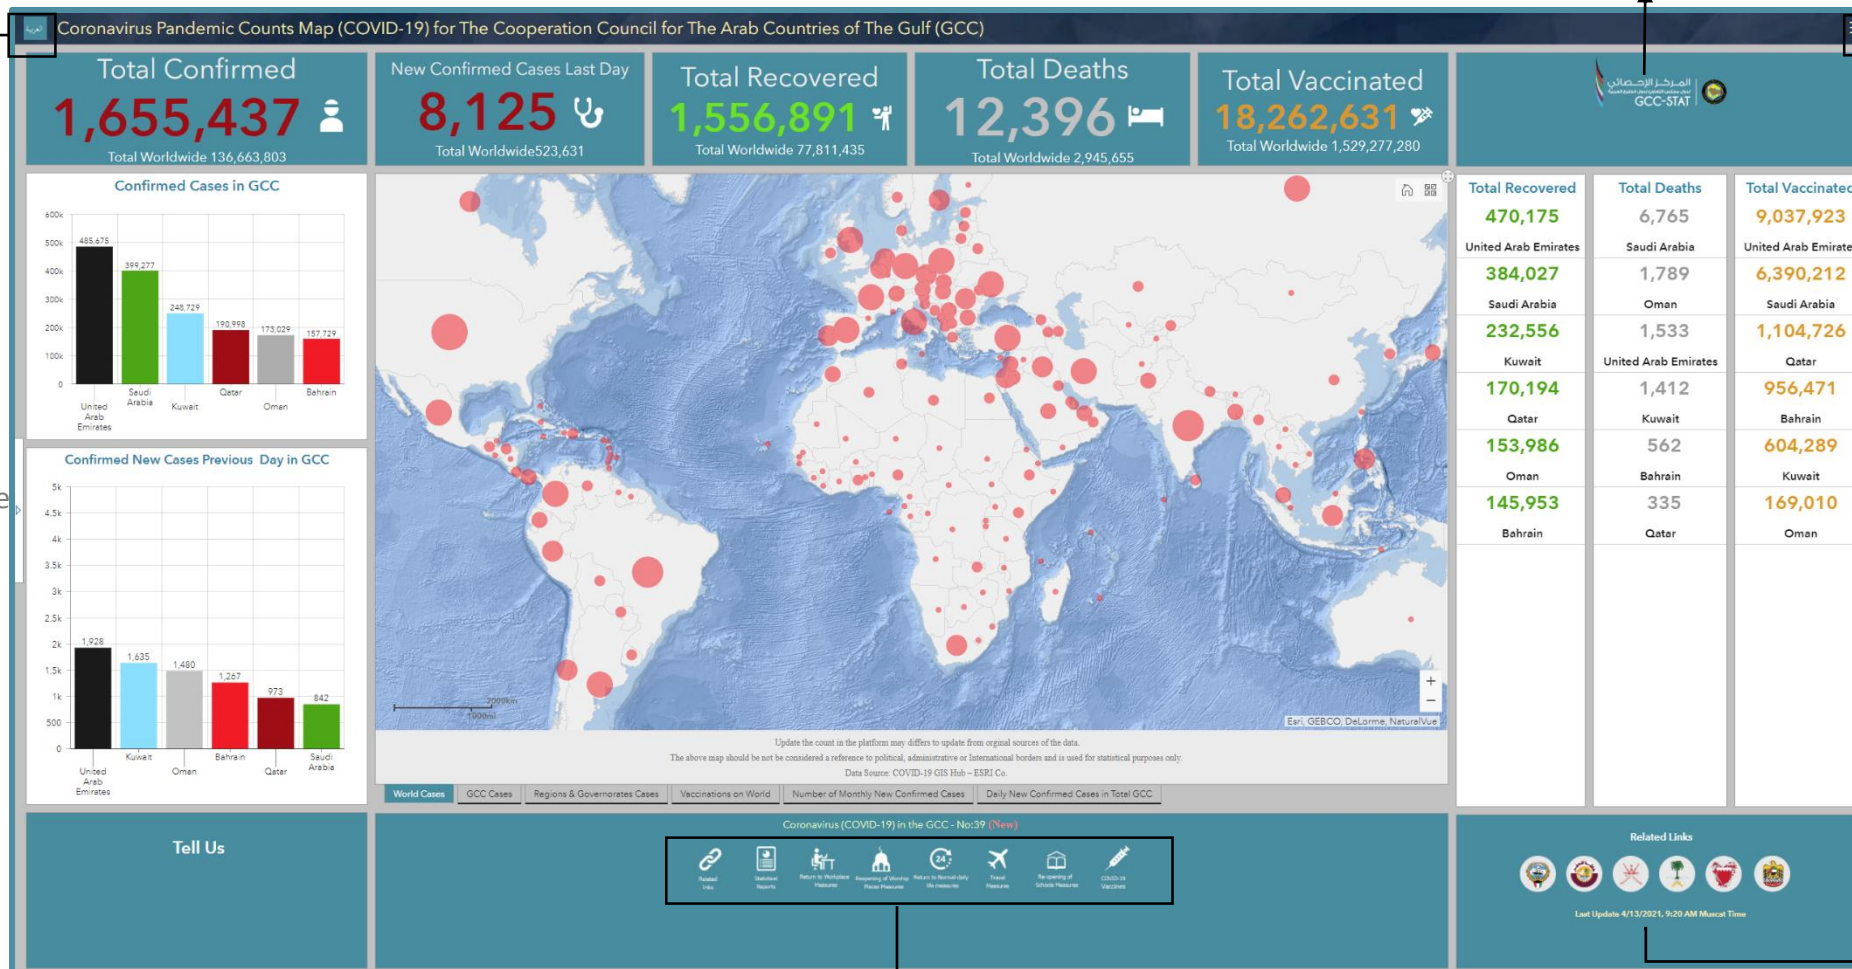

Covid19-gccstat.org
Introduction

The GCC-STAT launched a platform to follow up the developments of the spread of novel Corona Virus (COVID-19) in the GCC Countries, by updating the number of cases and the progress of their health status continuously.

The Platform provides a unified number for each GCC country showing the total number of confirmed cases, recovered and deaths, as well as the number of doses given "vaccines".

In addition, the Platform generates separate statistics for each GCC country, and links the online platform of coronavirus statistics to the GCC countries through a single international database that is updated constantly. It includes statistics reports prepared by the GCC-STAT regarding the Coronavirus, along with charts and infographic designs to keep you posted and updated. The GCC-STAT hopes you all stay safe and healthy.
